Dear Pharmacist

Re: Pharmacy Sexual Health Services Patient Group Direction Extension

I am writing to confirm that, following consultation with the PGD author and signatories, it is Staffordshire County Council's intention to extend the existing Patient Group Direction Agreements for;

- Supply and/or administration of levonorgestrel 1500micrograms tablet(s) for emergency contraception
- Supply and/or administration of ulipristal acetate 30mg tablet for emergency contraception
- ASYMPTOMATIC CHLAMYDIA TRACHOMATIS INFECTION Azithromycin 250mg/500mg tablets
- ASYMPTOMATIC CHLAMYDIA TRACHOMATIS INFECTION Doxycycline 100mg capsules

for a further period of **[6] six** months from **1st April 2024 to 31st October 2024**.

This is to allow for changes to our Patient Group Direction Governance Structure and a review of the current documentation. New Patient Group Direction agreements will be released in due course.

Yours sincerely,

p.p.

Anthony Bullock

Lead Commissioner

Public Health & Prevention Team
